

BETTER INSIGHT.

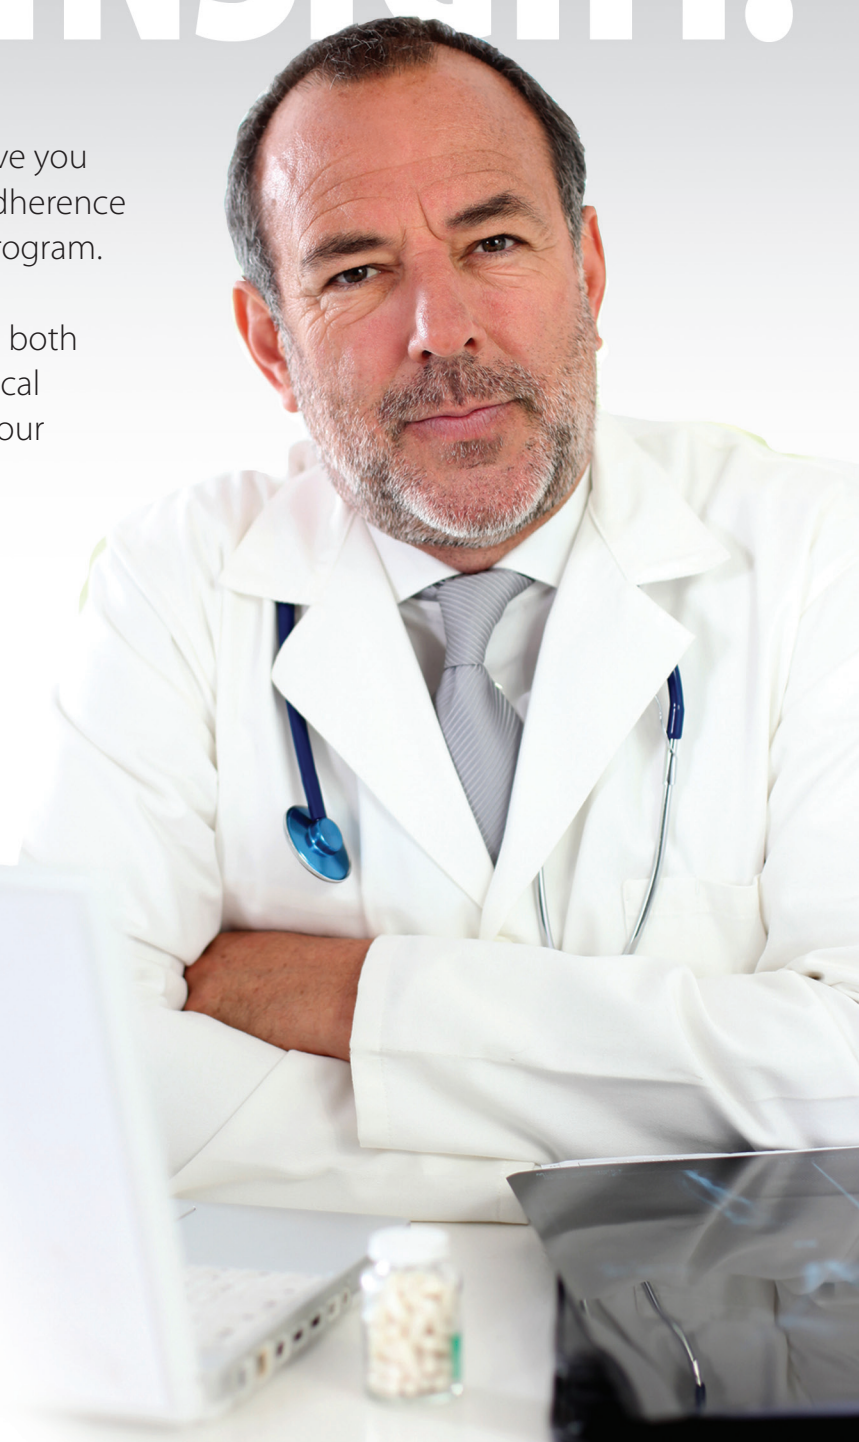

Today's standard drug monitoring can leave you with an unclear picture of your patients' adherence to their prescription drug management program.

AFTS Labs offers a combined approach of both urine and oral fluid drug testing. This tactical approach provides a deeper insight into your patient's history, making it easier to make informed clinical decisions.

Using **AFTS Labs**, you can take advantage of several key benefits:

- **Gain a clearer picture** of your patients' prescription usage with both Oral Fluid and Urine Testing.
- **Customized testing panels** tailored to your specific patient base.
- **One-on-one collaboration** with a qualified staff of toxicologists.

Insightful testing with scientifically supported results. That's what AFTS Labs is all about.

See us at PAINweek 2012, Sept. 5-8. The Cosmopolitan of Las Vegas. Booth #XXXX.
